Tratamiento de Señales

Version 2023-2

Make images come alive with scikit-image

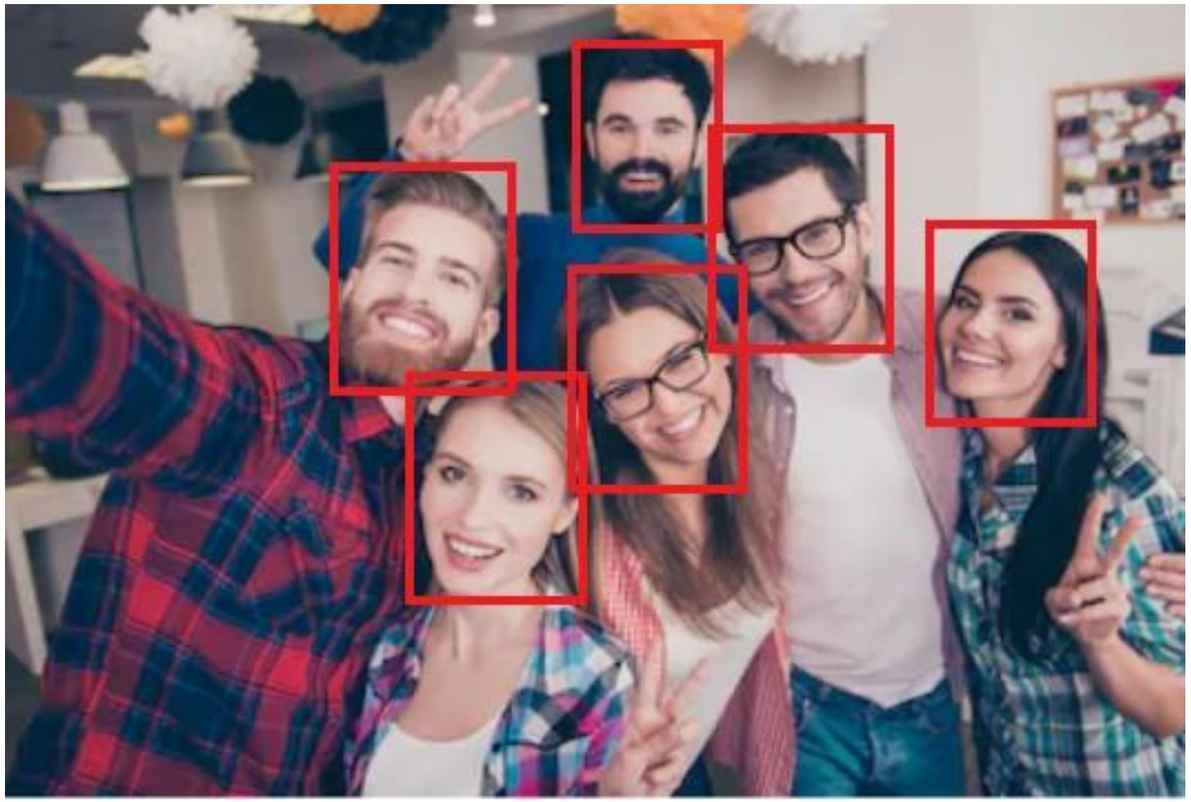
Dr. José Ramón Iglesias

DSP-ASIC BUILDER GROUP
Director Semillero TRIAC
Ingenieria Electronica
Universidad Popular del Cesar

What is image processing?

Operations on images and videos to:

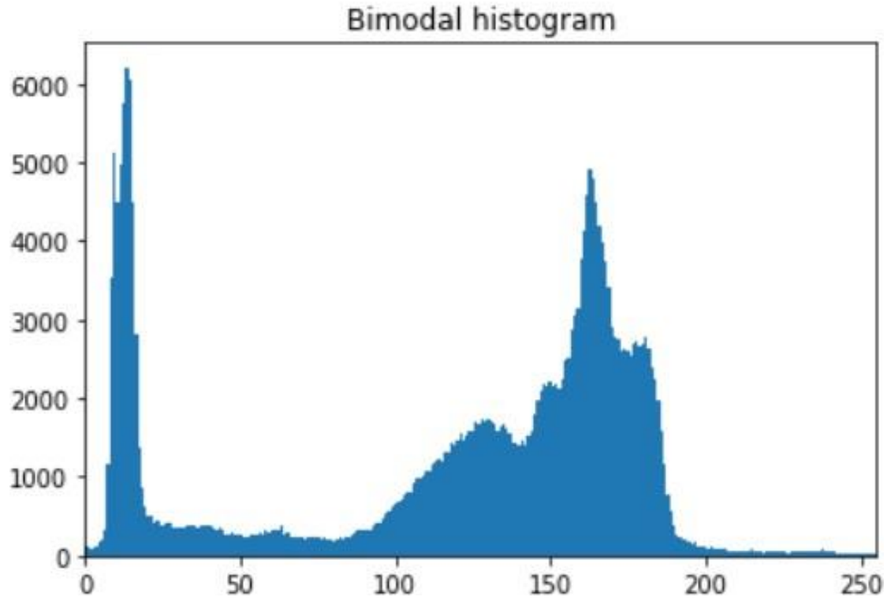
- Enhance an image
- Extract useful information
- Analyze it and make decisions



What is image processing?

Operations to on images and videos to:

- Enhance an image
- Extract useful information
- Analyze it and make decisions



Applications

- Medical image analysis
- Arti cial intelligence
- Image restoration and enhancement
- Geospatial computing
- Surveillance
- Robotic vision
- Automotive safety
- And many more...

Purposes

1. Visualization:
   - Objects that are not visible
2. Image sharpening and restoration
   - A be er image
3. Image retrieval
   - Seek for the image of interest
4. Measurement of pa ern
   - Measures various objects
5. Image Recognition
   - Distinguish objects in an image

Intro to scikit-image

- Easy to use
- Makes use of Machine Learning
- Out of the box complex algorithms

scikit-image
image processing in python

What is an image?

Images in scikit-image

```
from skimage import data
rocket_image = data.rocket()
```

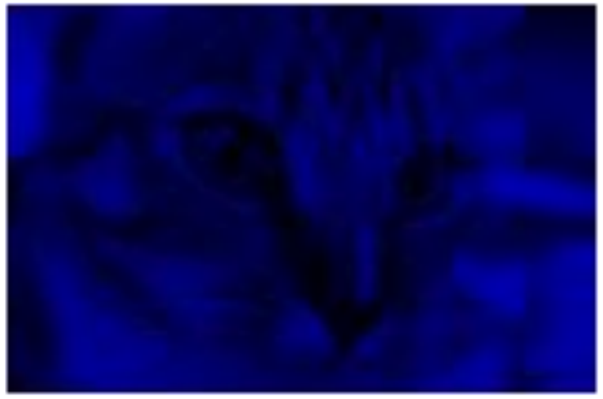
RGB channels

RGB

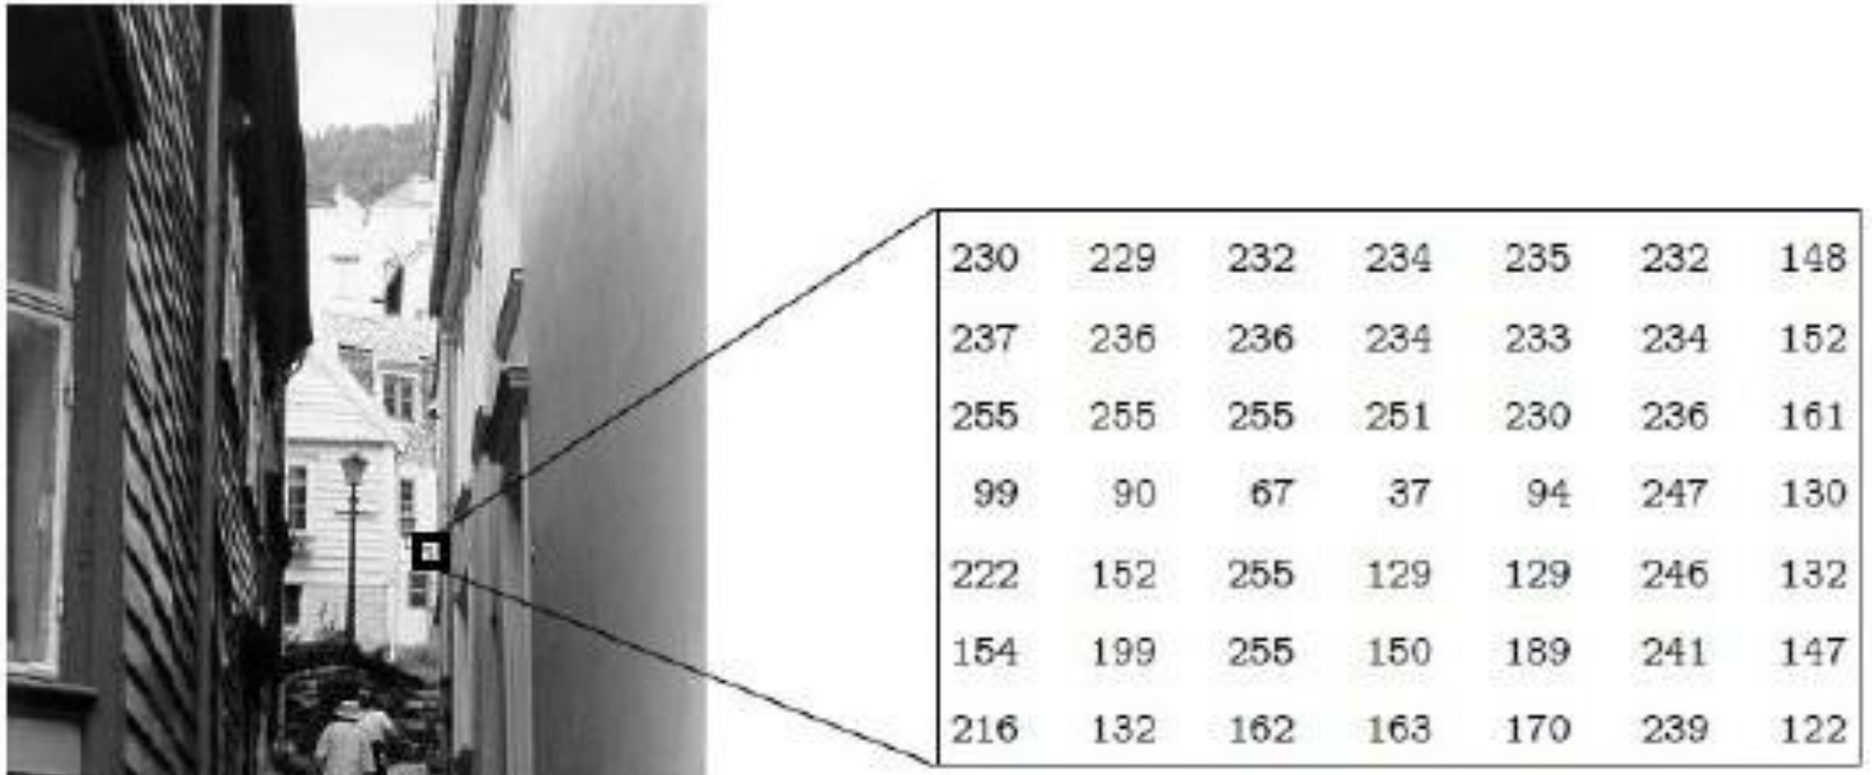
Red channel

Green channel

Blue channel



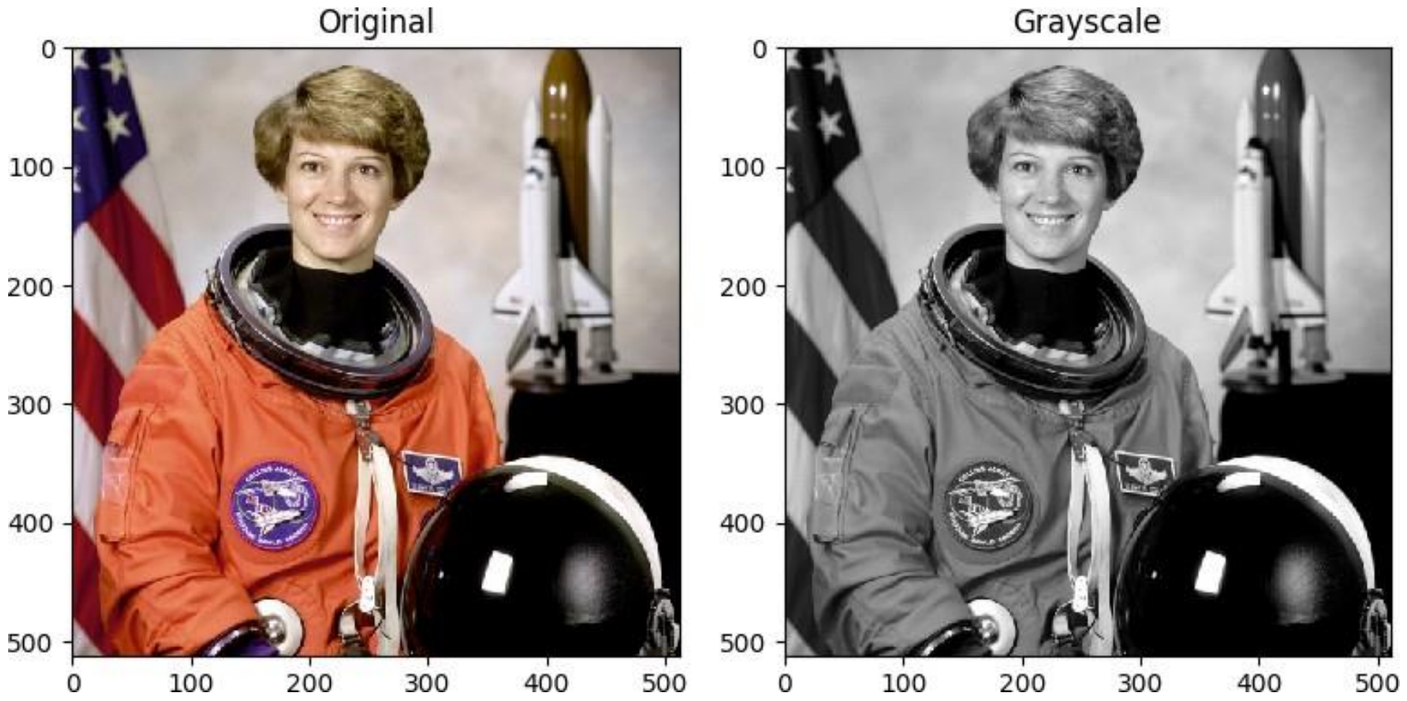
Grayscaled images



230	229	232	234	235	232	148
237	236	236	234	233	234	152
255	255	255	251	230	236	161
99	90	67	37	94	247	130
222	152	255	129	129	246	132
154	199	255	150	189	241	147
216	132	162	163	170	239	122

RGB vs Grayscale

```
from skimage import color
grayscale = color.rgb2gray(original)
rgb = color.gray2rgb(grayscale)
```



Visualizing images in the course

Don't worry about Matplotlib!

```
def show_image(image, title='Image', cmap_type='gray'):
def show_image
    plt.imshow(image, cmap=cmap_type)

    plt.title(title)

    plt.axis('off')

    plt.show()
```

Visualizing images in the course

```
from skimage import color
grayscale = color.rgb2gray(original)

show_image(grayscale, "Grayscale")
```

Let's practice!

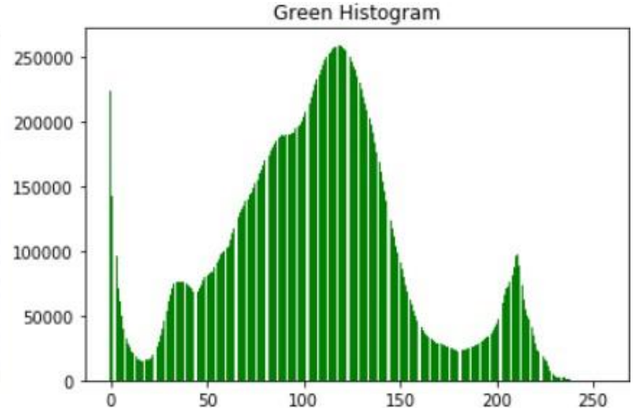
IMAGE PROCESSING IN PYTHON

NumPy for images

IMAGE PROCESSING IN PYTHON

NumPy for images

- Fundamentals of image processing techniques
  - Flipping
  - Extract and analyze features



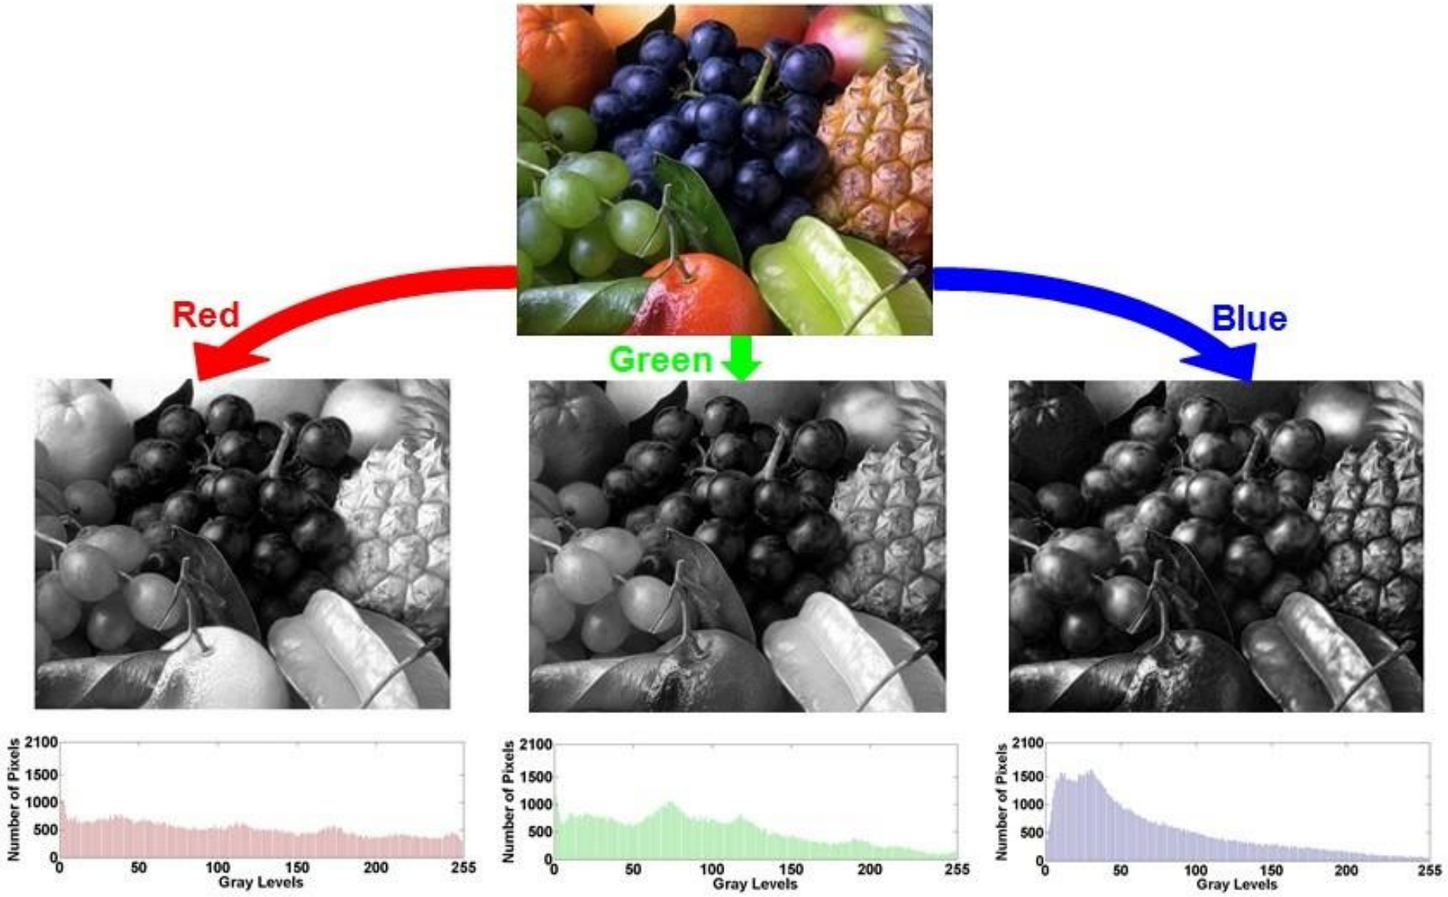
Images as NdArrays

```
# Loading the image using Matplotlib
madrid_image = plt.imread('/madrid.jpeg')

type(madrid_image)
```

```
<class 'numpy.ndarray'>
```

Colors with NumPy



Colors with NumPy

```
# Obtaining the red values of the image
red = image[:, :, 0]

# Obtaining the green values of the image
green = image[:, :, 1]

# Obtaining the blue values of the image
blue = image[:, :, 2]
```

Colors with NumPy

```
plt.imshow(red, cmap="gray")
plt.title('Red')
plt.axis('off')
plt.show()
```

Shapes

```
# Accessing the shape of the image
madrid_image.shape
```

```
(426, 640, 3)
```

Sizes

```
# Accessing the shape of the image
madrid_image.size
```

```
817920
```

Flipping images: vertical y

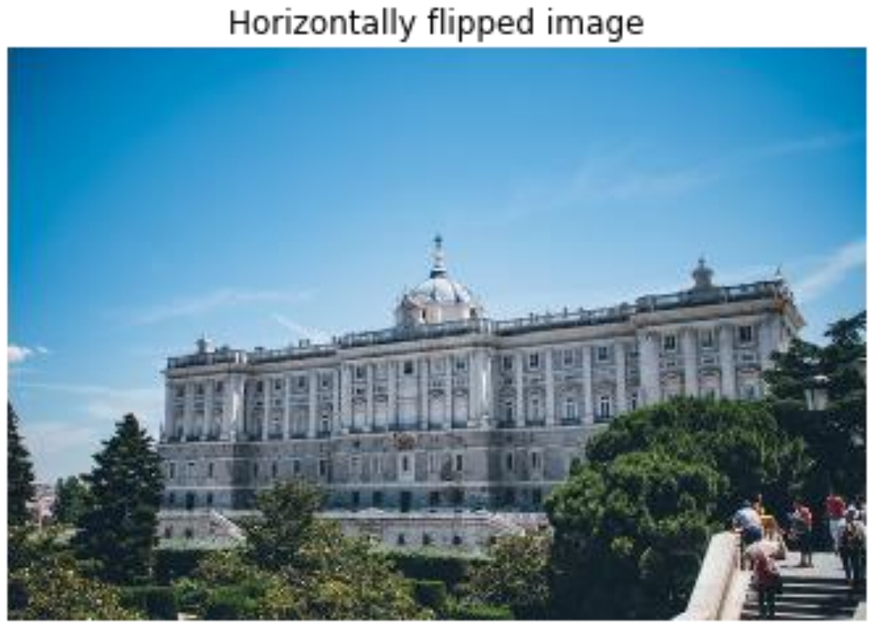
```
# Flip the image in up direction
vertically_flipped = np.flipud(madrid_image)

show_image(vertically_flipped, 'Vertically flipped image')
```

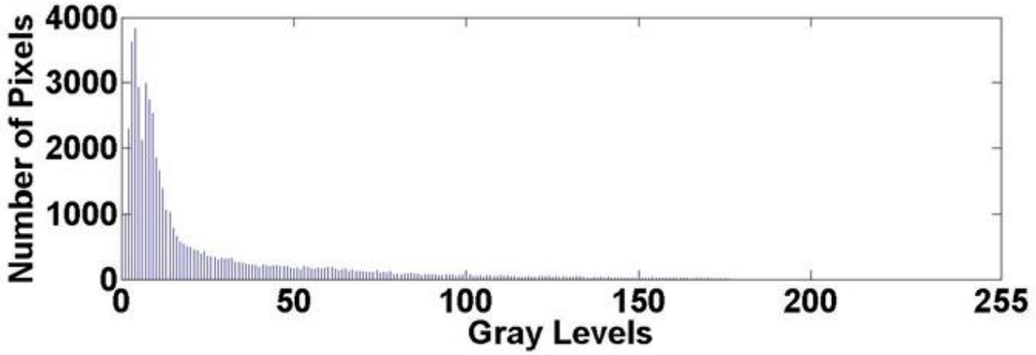
Flipping images: horizontaly

```
# Flip the image in left direction
horizontally_flipped = np.fliplr(madrid_image)

show_image(horizontally_flipped, 'Horizontally flipped image')
```

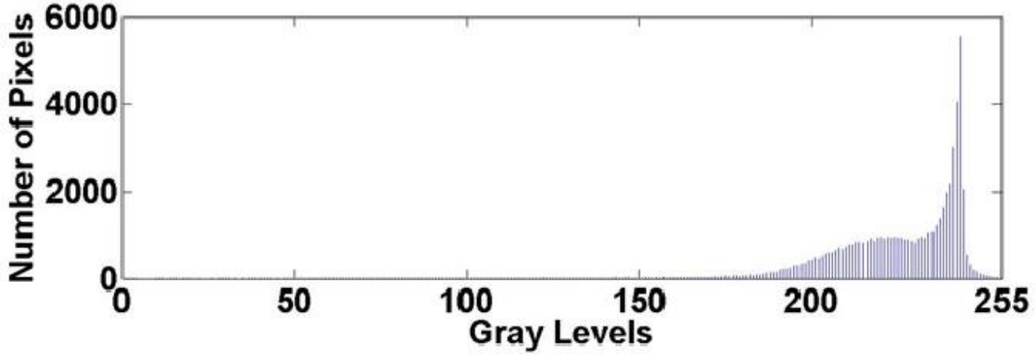


What is a histogram?



(a)

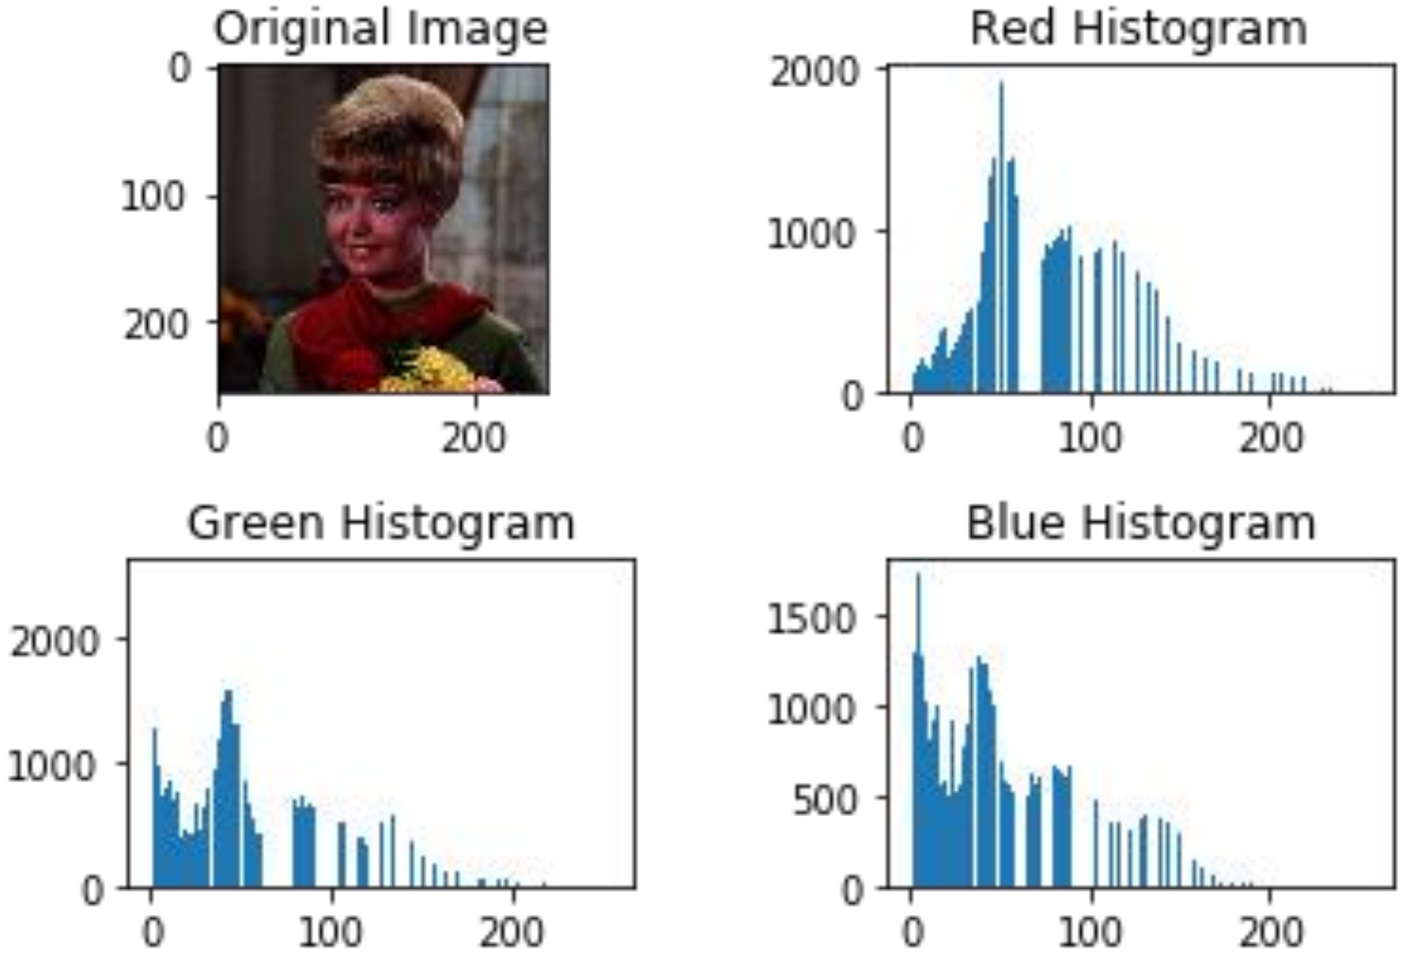
(b)



(a)

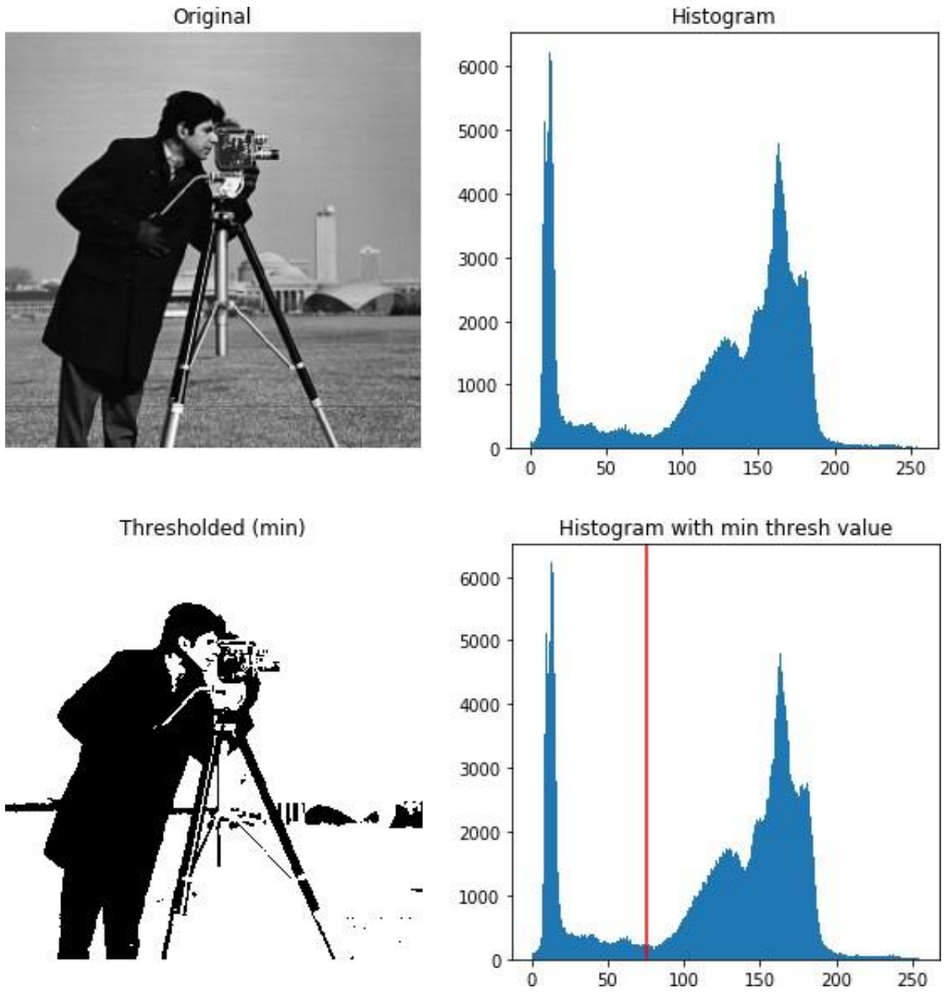
(b)

Color histograms

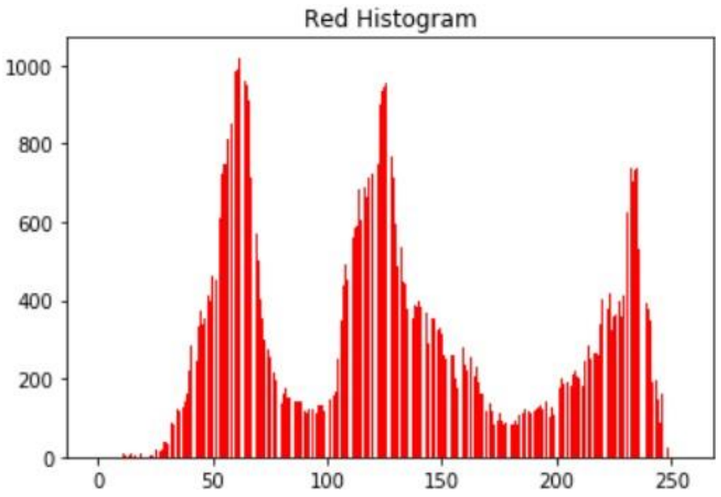


Applications of histograms

- Analysis
- Thresholding
- Brightness and contrast
- Equalize an image



Histograms in Matplotlib



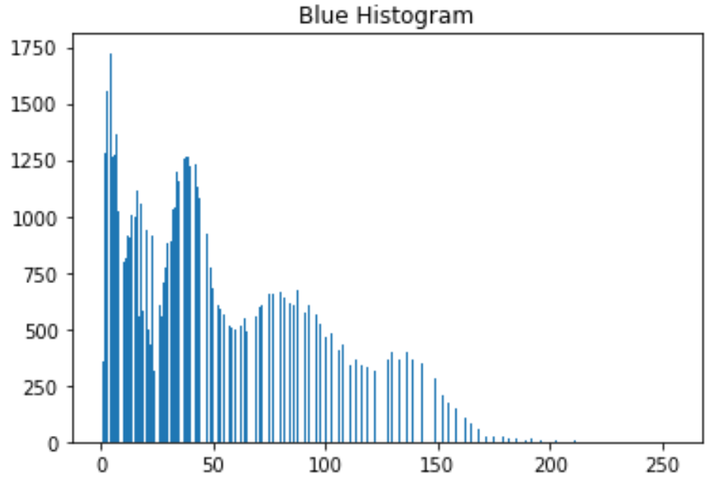
```
# Red color of the image
red = image[:, :, 0]

# Obtain the red histogram
plt.hist(red.ravel(), bins=256)
```

Visualizing histograms with Matplotlib

```
blue = image[:, :, 2]

plt.hist(blue.ravel(), bins=256)
plt.title('Blue Histogram')
plt.show()
```



Let's practice!

IMAGE PROCESSING IN PYTHON

Getting started with thresholding

IMAGE PROCESSING IN PYTHON

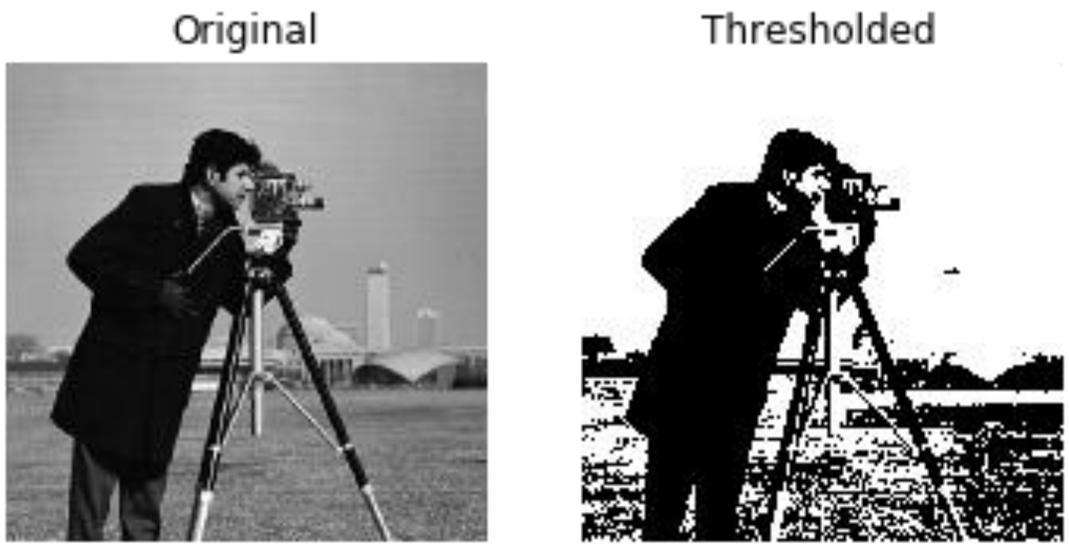
Thresholding

Partitioning an image into a foreground and background

By making it black and white

We do so by se ing each pixel to:

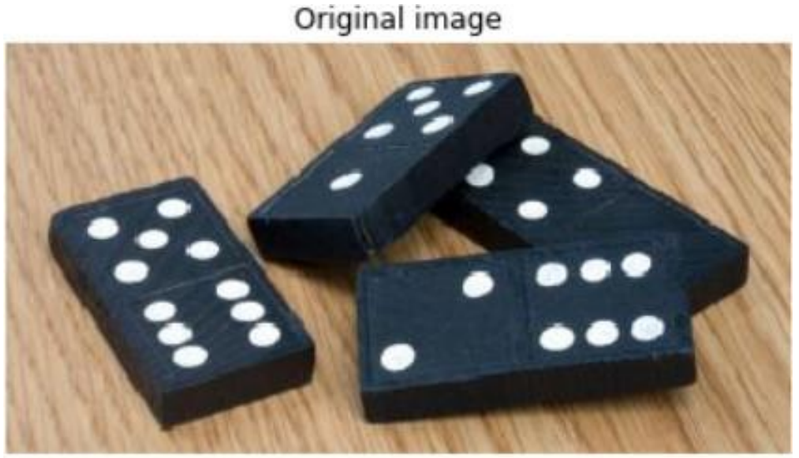
- 255 (white) if pixel > thresh value
- 0 (black) if pixel < thresh value

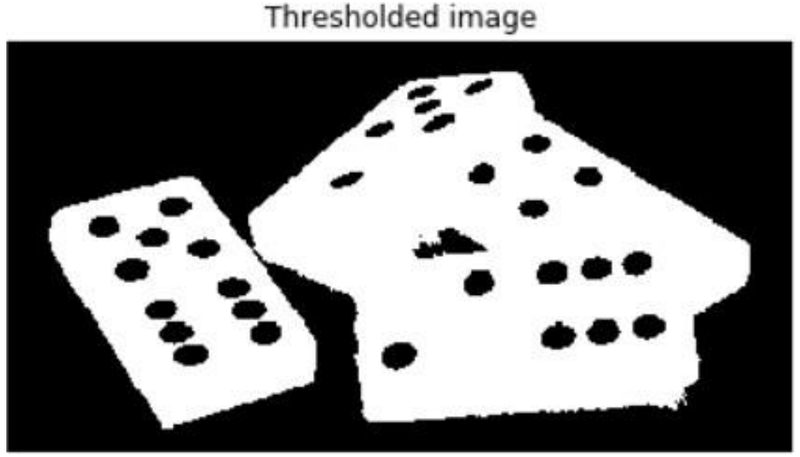


Thresholding

Simplest method of image segmentation

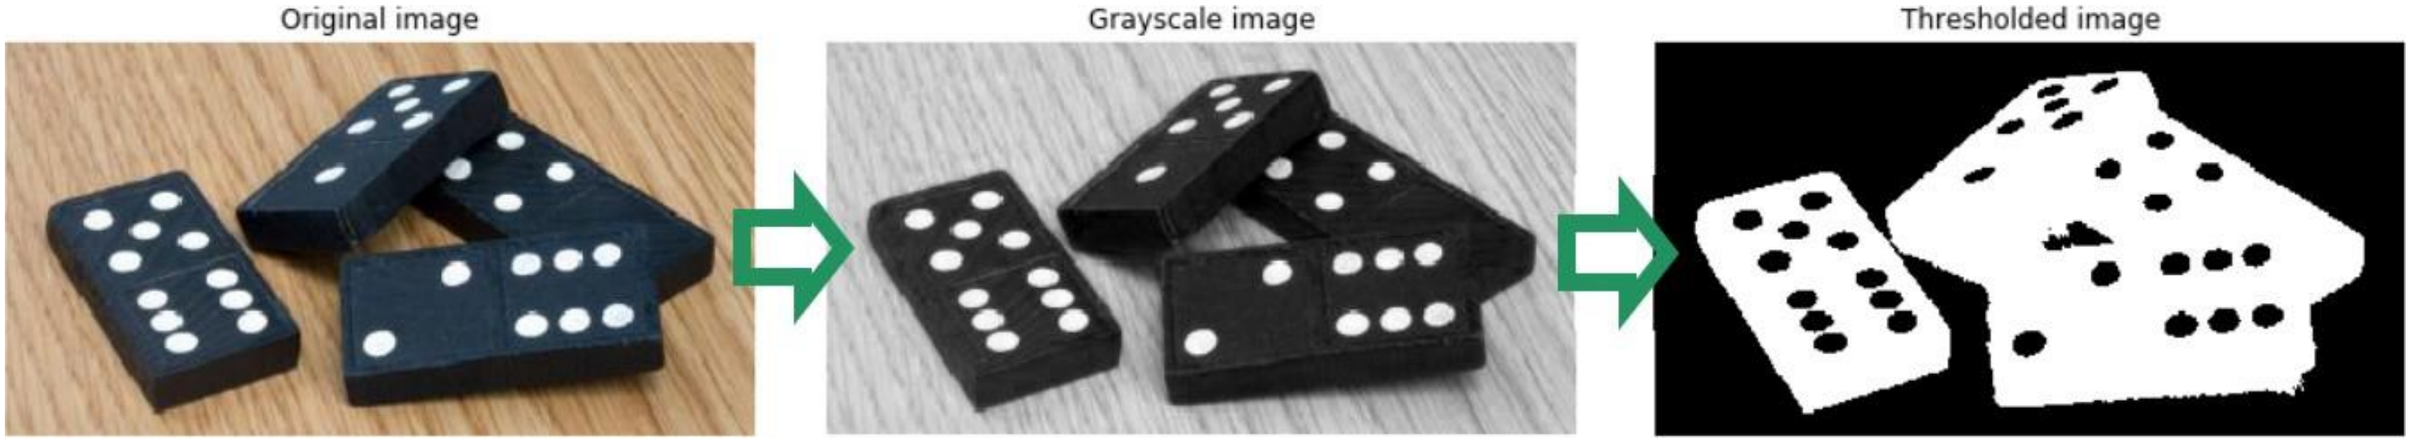
- Isolate objects
  - Object detection
  - Face detection
  - Etc.





Thresholding

Only from grayscale images

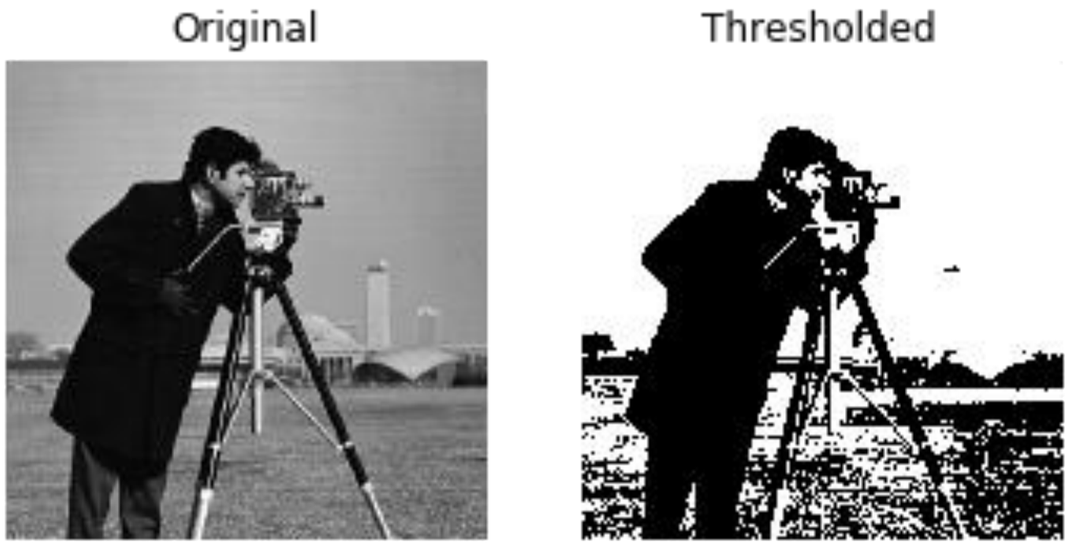


Apply it

```
# Obtain the optimal threshold value
thresh = 127

# Apply thresholding to the image
binary = image > thresh

# Show the original and thresholded
show_image(image, 'Original')
show_image(binary, 'Thresholded')
```

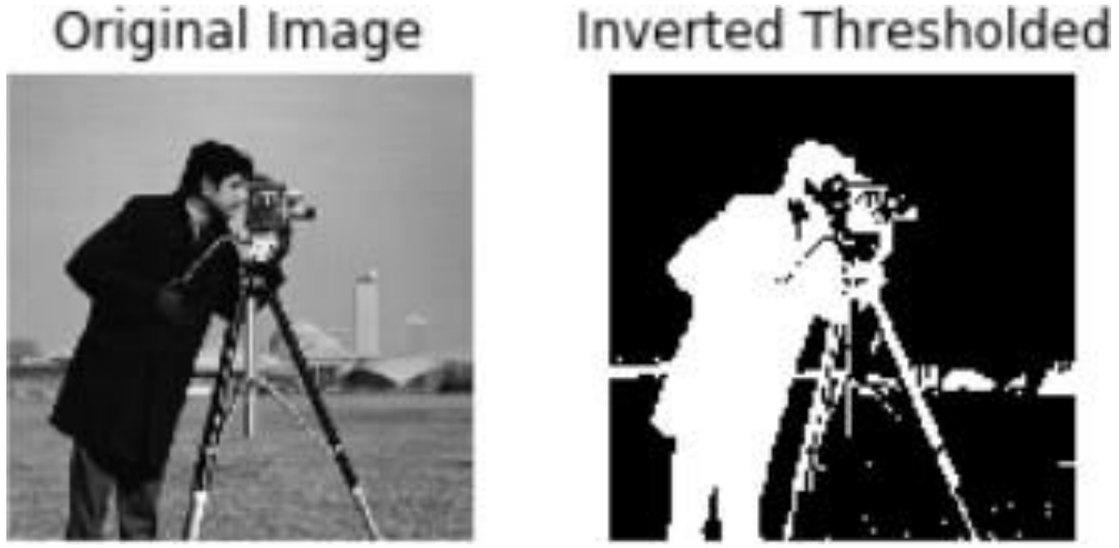


Inverted thresholding

```
# Obtain the optimal threshold value
thresh = 127

# Apply thresholding to the image
inverted_binary = image <= thresh

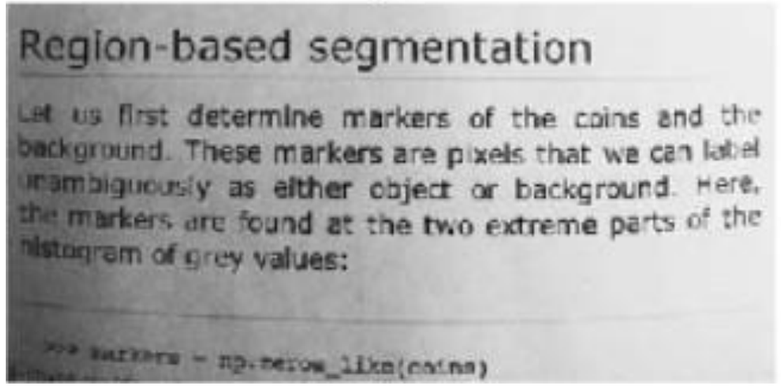
# Show the original and thresholded
show_image(image, 'Original')
show_image(inverted_binary,
           'Inverted thresholded')
```



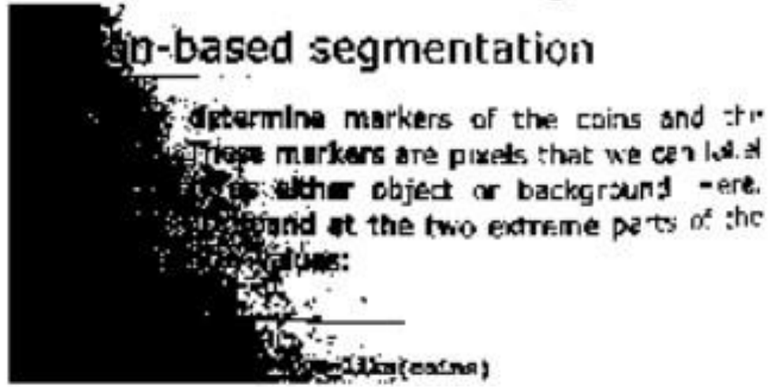
Categories

- Global or histogram based: good for uniform backgrounds
- Local or adaptive: for uneven background illumination

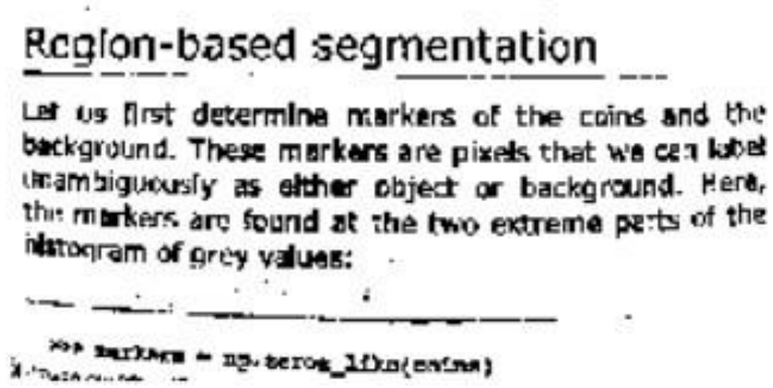
Original



Global thresholding



Local thresholding



Try more thresholding algorithms

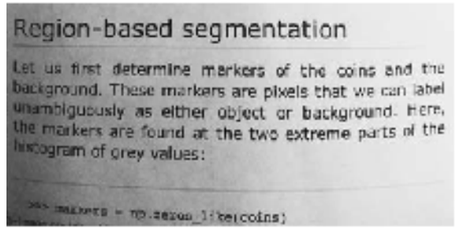
```
from skimage.filters import try_all_threshold

# Obtain all the resulting images
fig, ax = try_all_threshold(image, verbose=False)

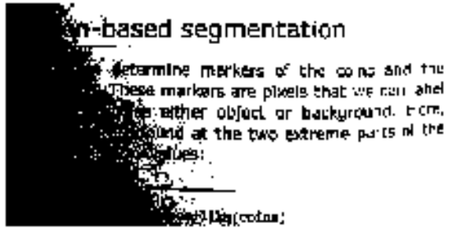
# Showing resulting plots
show_plot(fig, ax)
```

Try more thresholding algorithms

Original

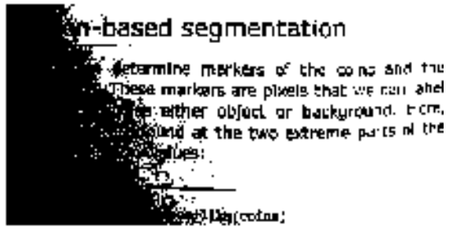


Isodata

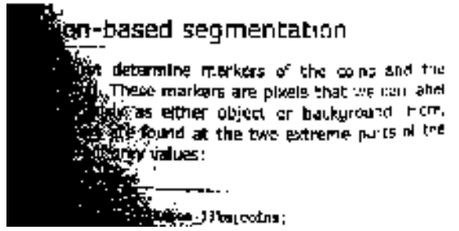


Minimum

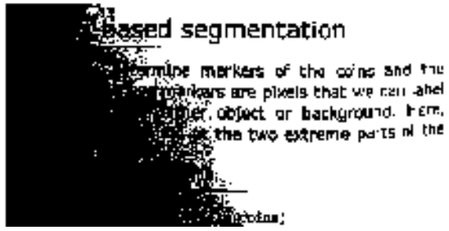
Otsu



Li

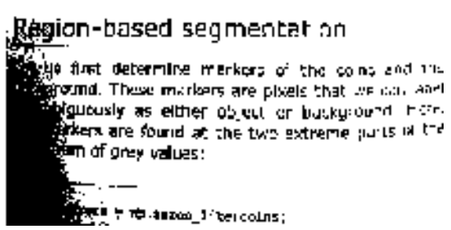


Mean



Triangle

Yen



Optimal thresh value

Global

Uniform background

```
# Import the otsu threshold function
from skimage.filters import threshold_otsu

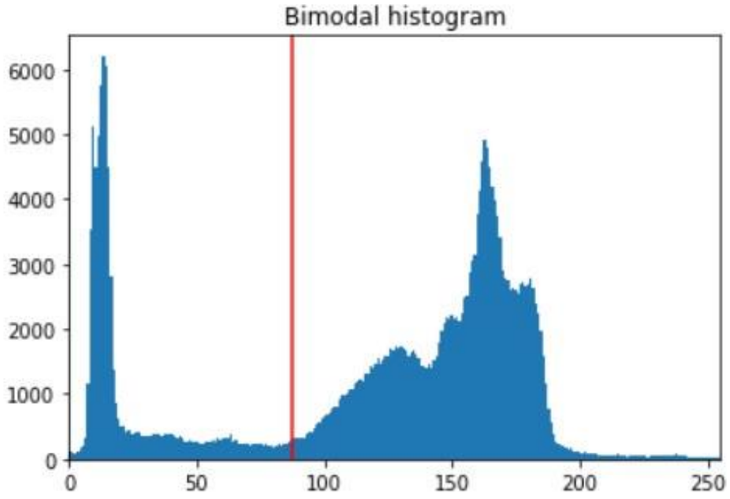
# Obtain the optimal threshold value
thresh = threshold_otsu(image)

# Apply thresholding to the image
binary_global = image > thresh
```

Optimal thresh value

Global

```
# Show the original and binarized image
show_image(image, 'Original')
show_image(binary_global, 'Global thresholding')
```



Optimal thresh value

Local

Uneven background

```
# Import the local threshold function
from skimage.filters import threshold_local

# Set the block size to 35
block_size = 35

# Obtain the optimal local thresholding
local_thresh = threshold_local(text_image, block_size, offset=10)

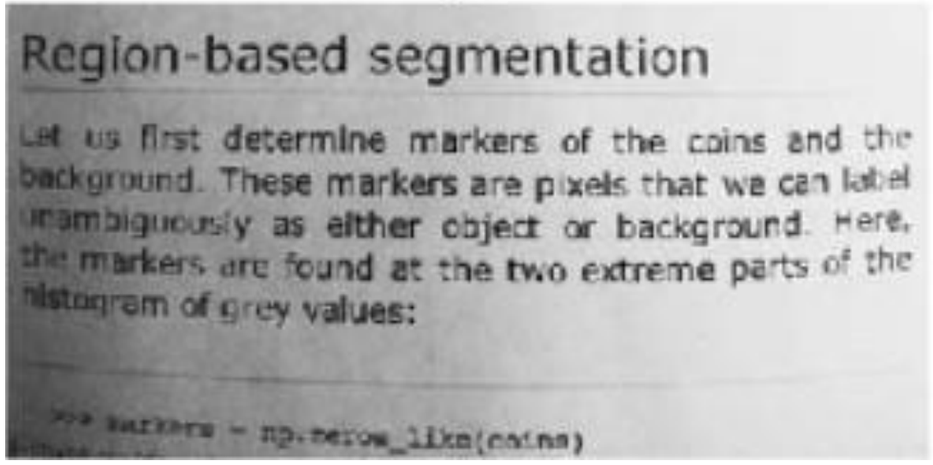
# Apply local thresholding and obtain the binary image
binary_local = text_image > local_thresh
```

Optimal thresh value

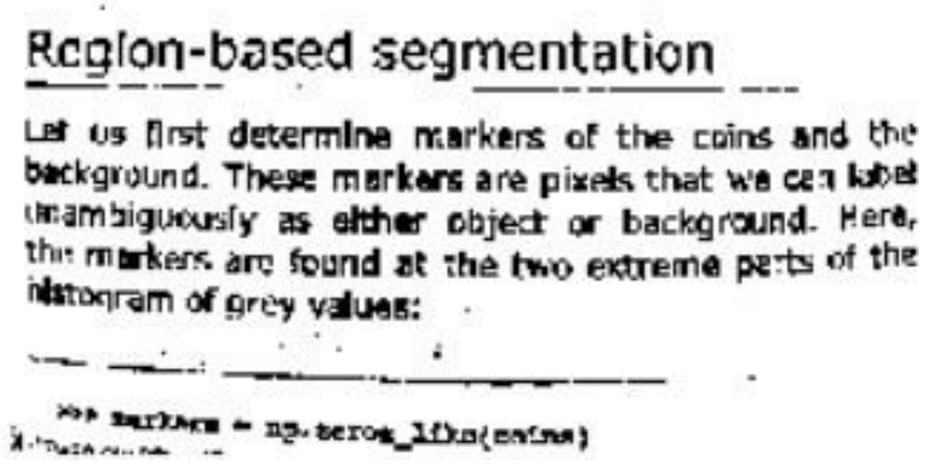
Local

```
# Show the original and binarized image
show_image(image, 'Original')
show_image(binary_local, 'Local thresholding')
```

Original



Local thresholding



Let's practice!
