### **Region Growing**

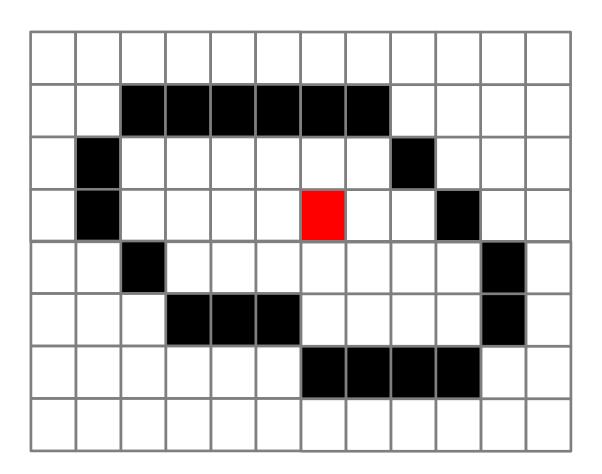

Se inicia la segmentación con una semilla que se dilata de manera iterativa siempre y cuando cumpla con determinadas condiciones de pertenencia.

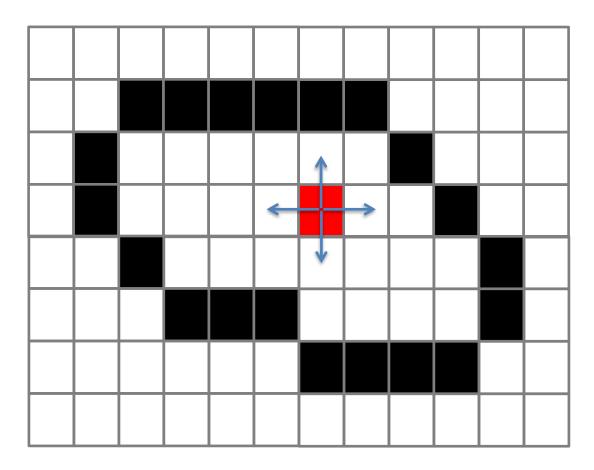

Existen algoritmos para imágenes binarias, en tonos de gris y a color.

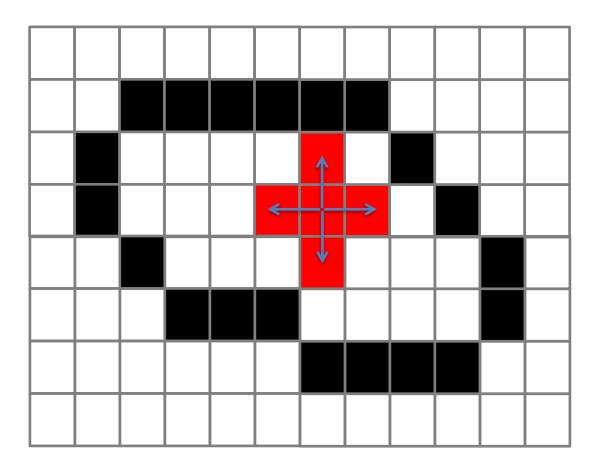

# Region Growing Binario

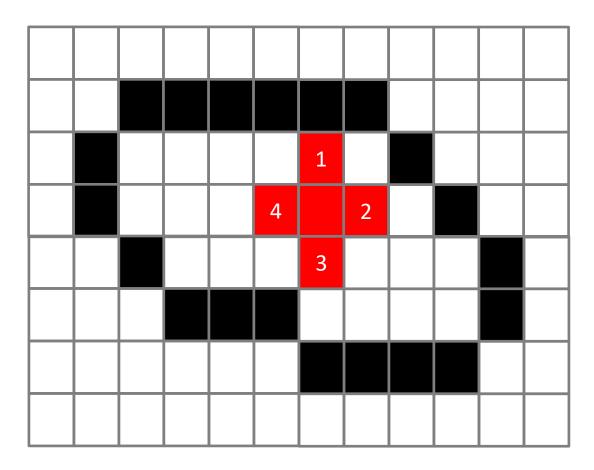

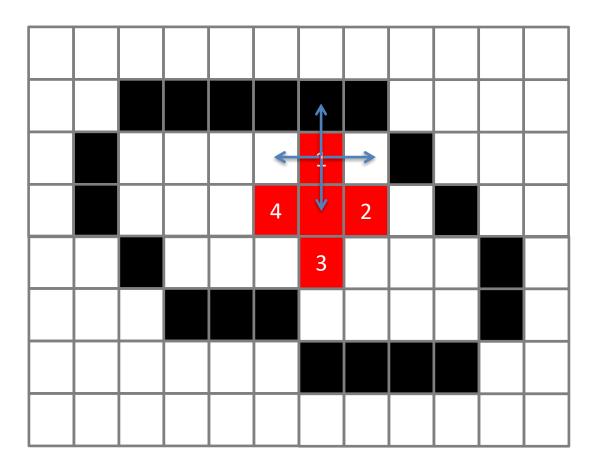

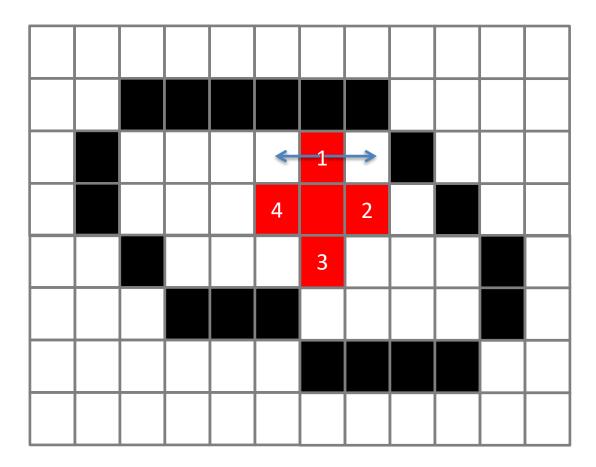

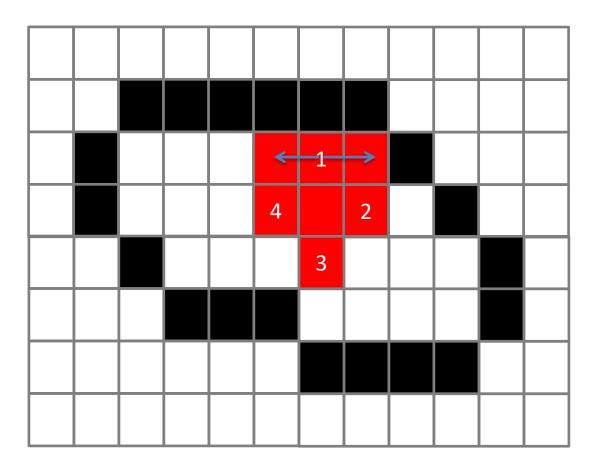

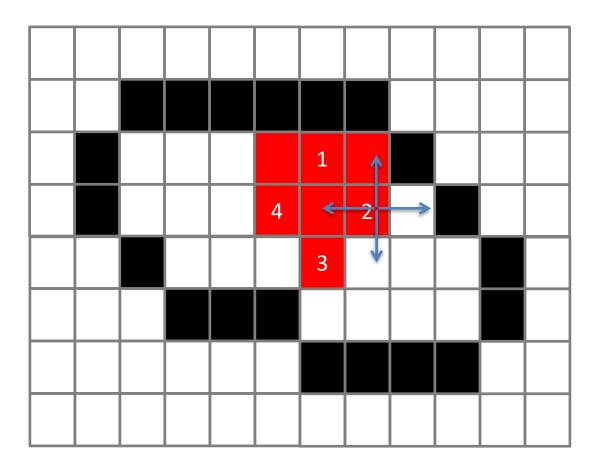

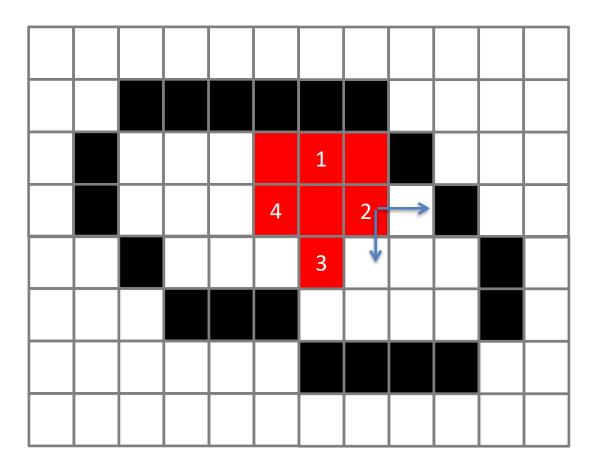

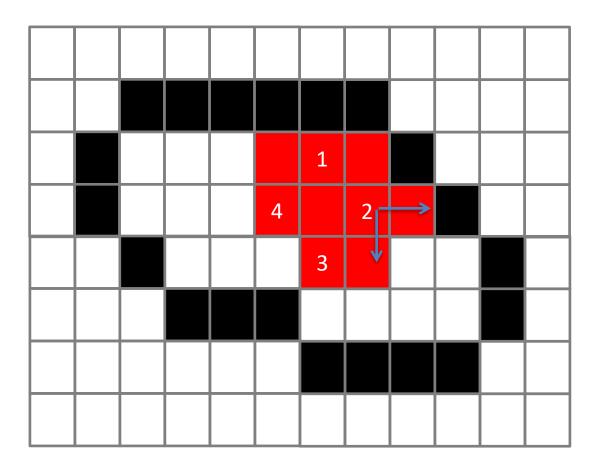

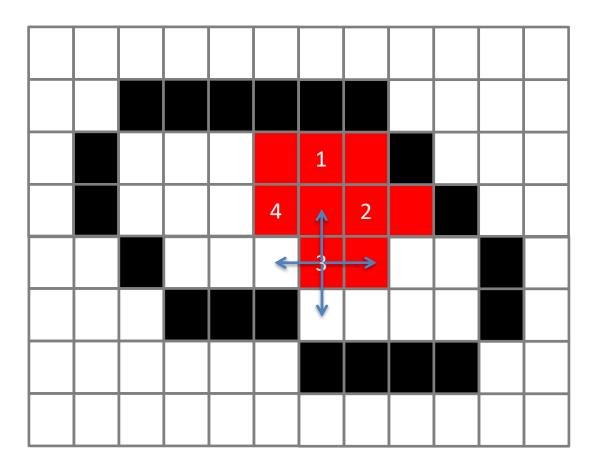

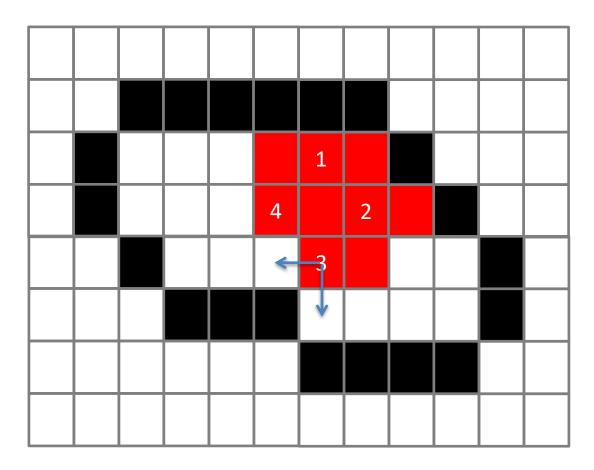

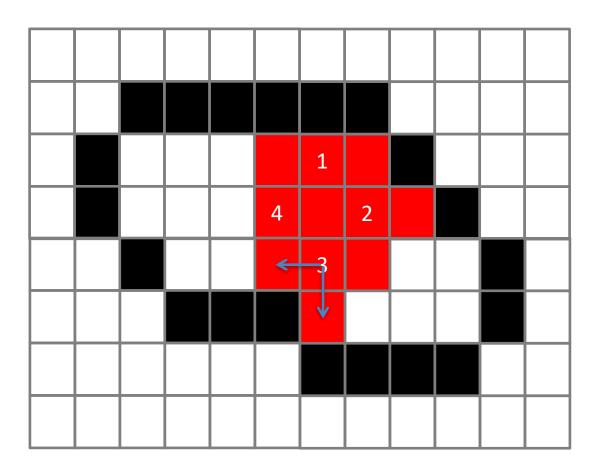

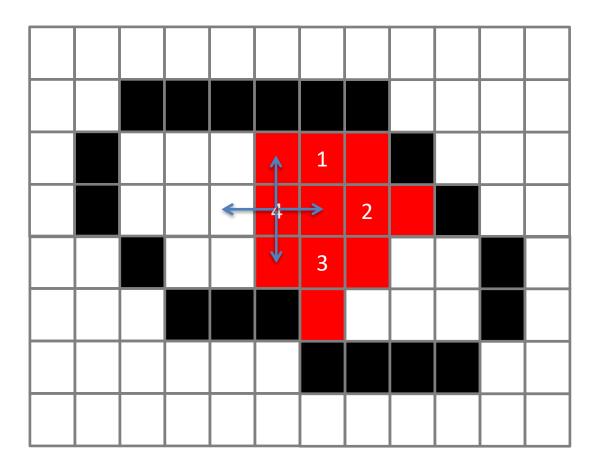

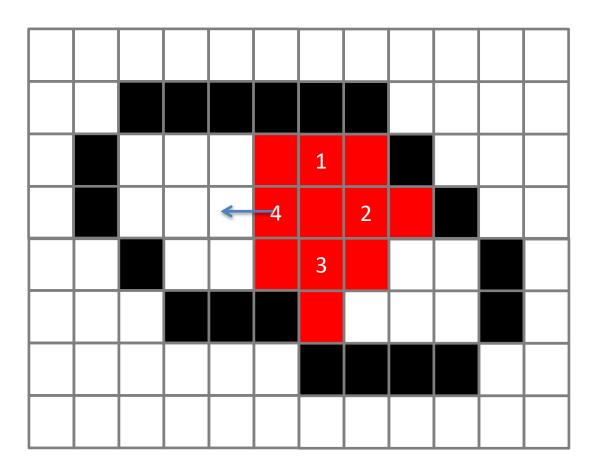

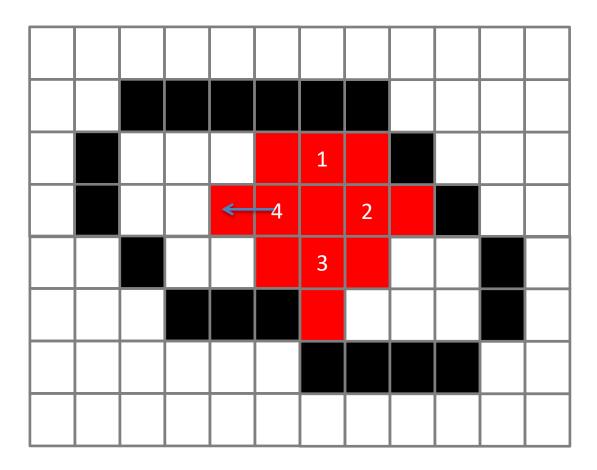

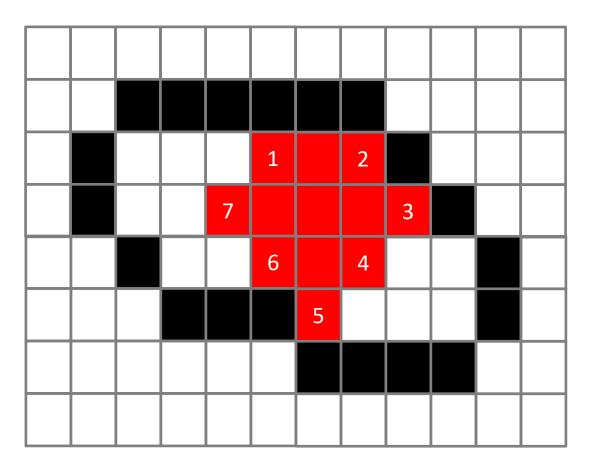

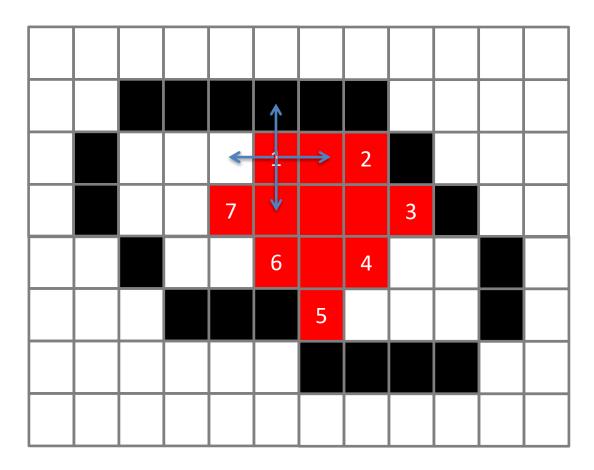

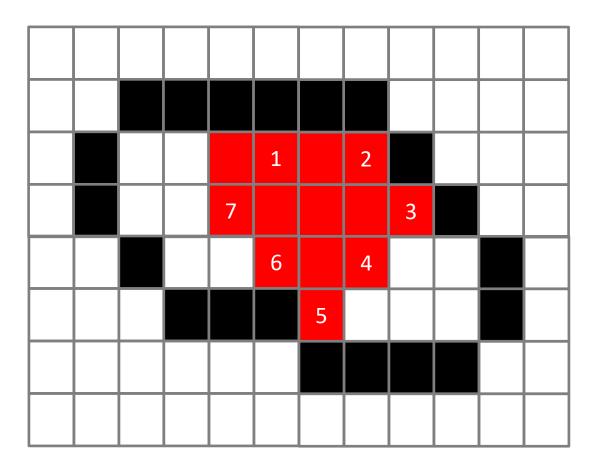

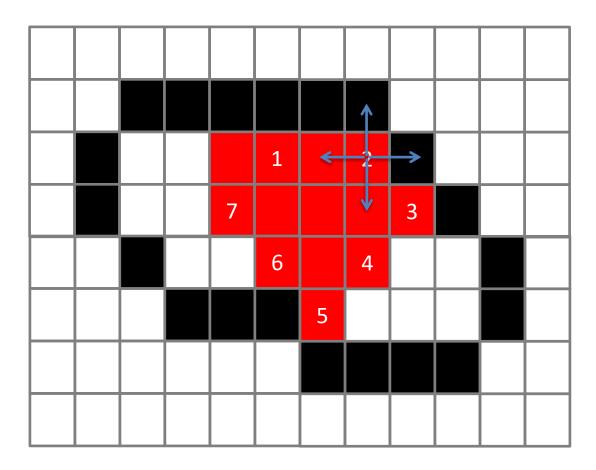

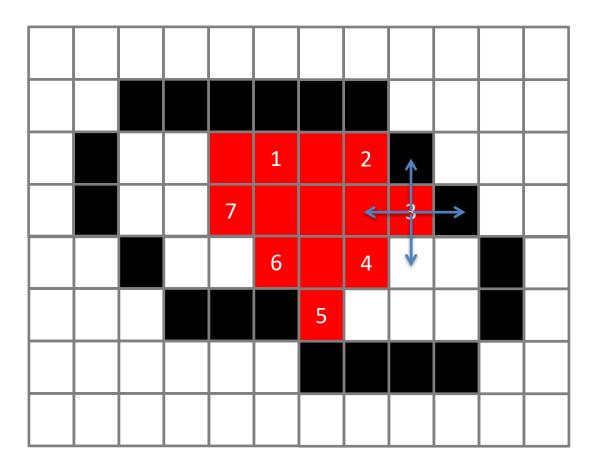

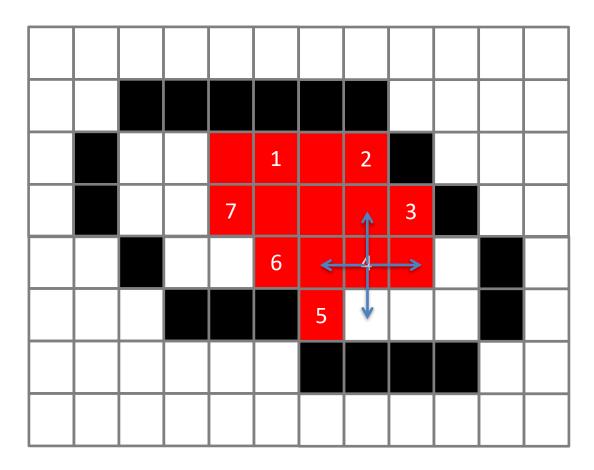

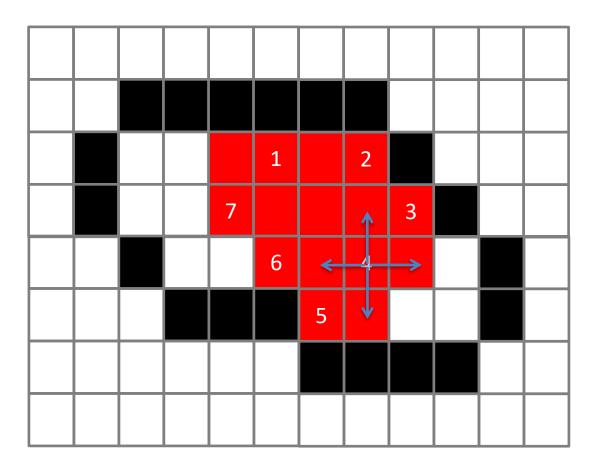

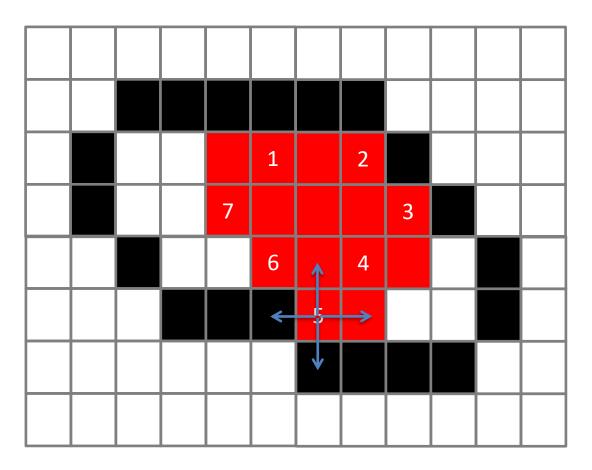

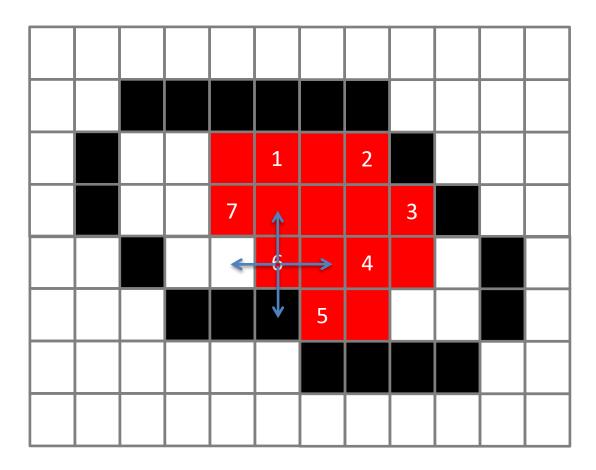

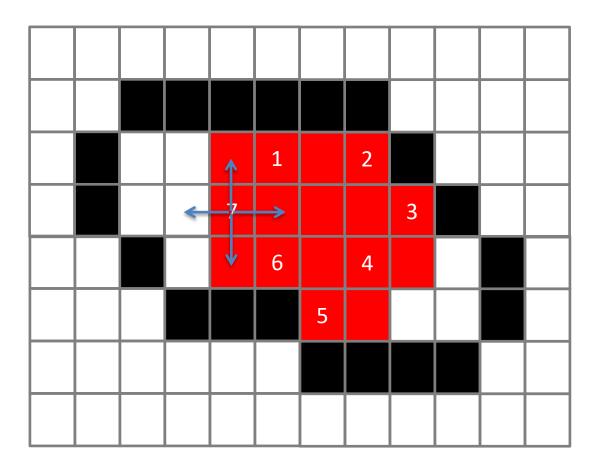

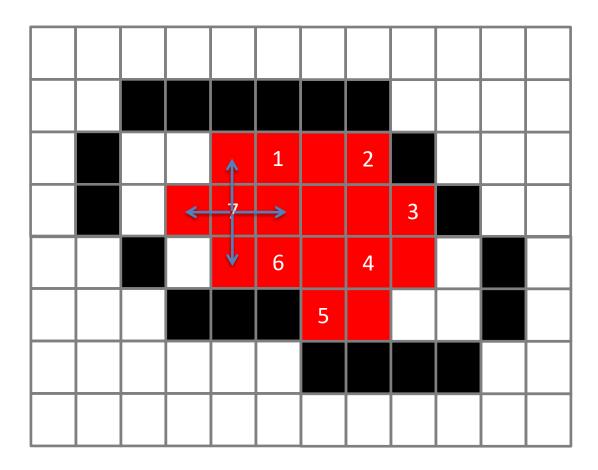

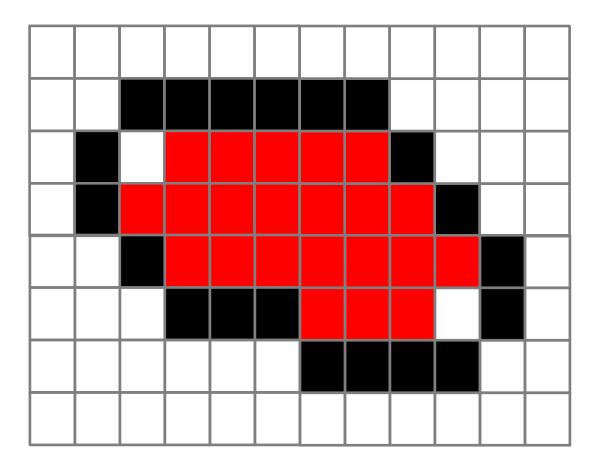

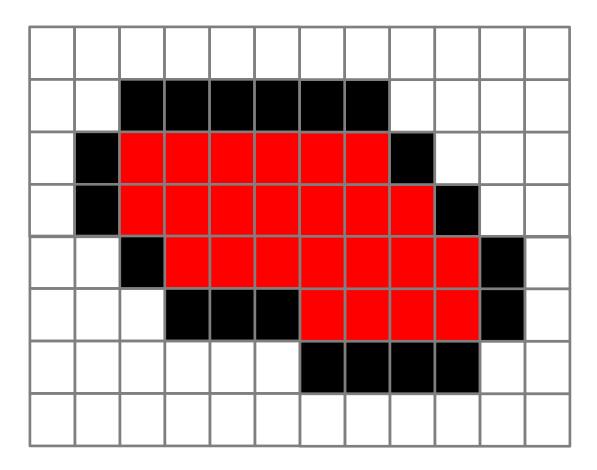

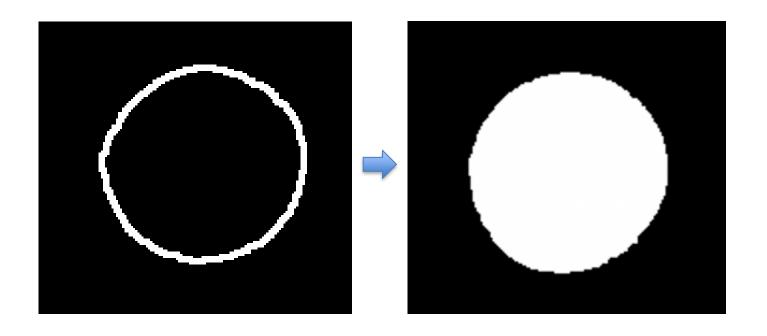

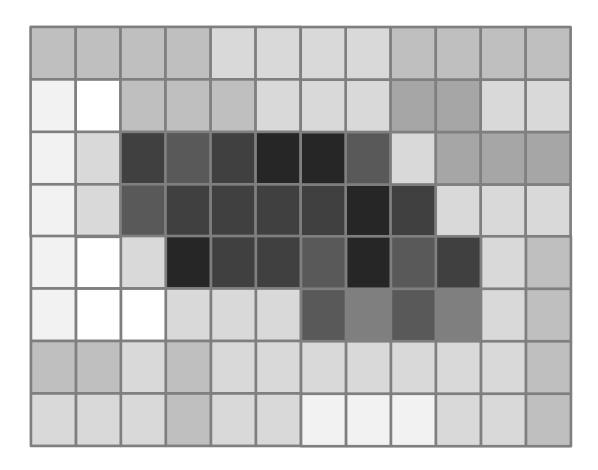

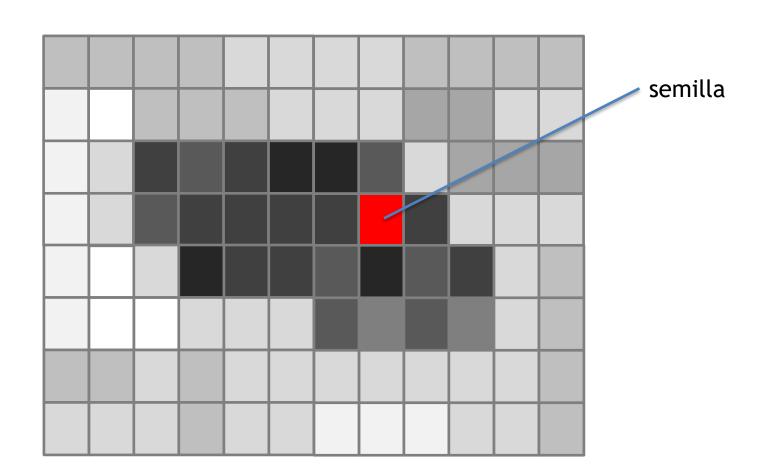

# Ejemplo en imágenes binarias

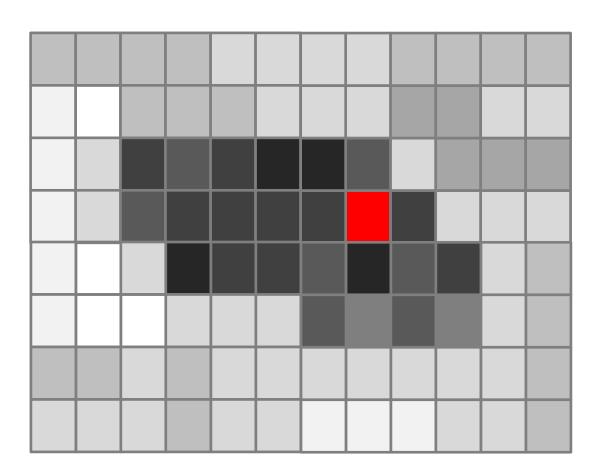

## Region Growing en Tonos de Gris

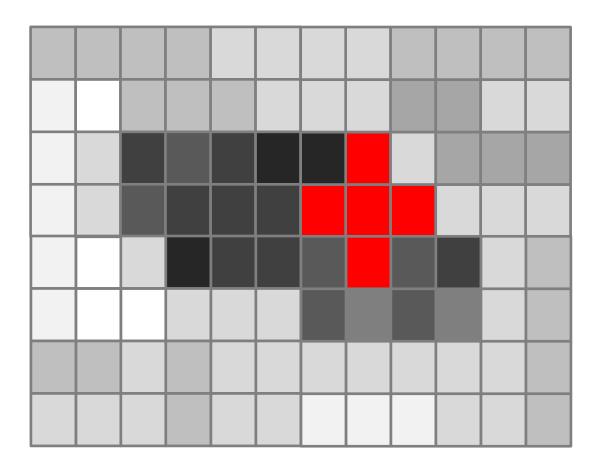

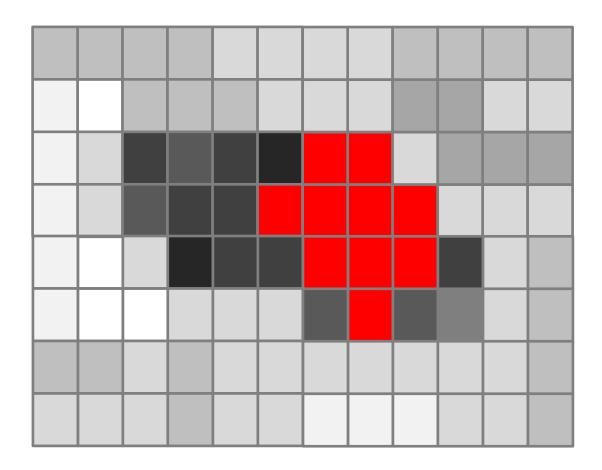

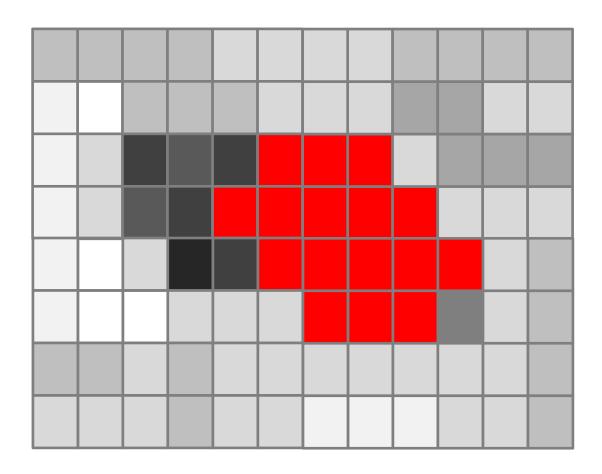

En cada iteración agregamos pixeles según la dilatación siempre y cuando cumpla una condición.

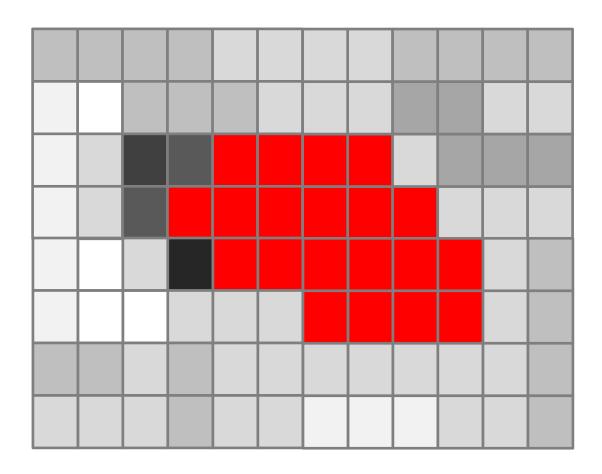

Ejemplo tono de gris similar.
